PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of professional experience building scalable web and mobile applications using React, Next.js, React Native, Typescript, GraphQL, and Supabase. Experienced in developing end-to-end features, from designing responsive user interfaces to implementing authentication, database integrations, RESTful APIs, and business logic. Enjoy building maintainable software that solves real-world problems and collaborating with designers and developers to deliver polished user experiences.

EXPERIENCE

June 2023 - July 2026

Full Stack Developer

Sigma Lab SDN BHD

- Developed Sismo's course-management experience, including reusable UI components, database schema, and a Next.js frontend integrated with GraphQL and Supabase.
- Developed Jobier's job-matching algorithm and React job-search UI; integrated GraphQL, Supabase, and REST APIs.
- Implemented authentication, course pages, navigation, and an interactive in-app coding terminal using React Native and Supabase for CodeoAI

January 2021 - November 2022

Audio Mixing Engineer

Kashfy Studios

- Created production templates and streamlined workflows supporting 30+ recording sessions.

EDUCATION

Full Stack Web Development

Sigma School

Diploma in Digital Audio Processing

International College of Music

FEATURED PROJECT

Dinefl0w — Full-stack café ordering and business management platform built with Next.js, Supabase, and DaisyUI. Developed authentication, an admin dashboard, sales analytics, and revenue/unpaid order tracking. That sounds more like a product than a feature list.
